

Why Do People Travel?

Can you imagine what is life without traveling? Is it possible? Whatever your reason is, traveling is a part of people's life. We all travel. The reason behind that is up to you.

There are different reasons why people travel:

1.) Most People Travel because they want to see their families and friends who live far away. Invitations from families and friends are seldom so you will decide to travel just to see them.

2.) People Travel because they want to see their soul mates. Some people believe that there is only one person for them and if they haven't had much luck searching in their area, they figured it out that even though there are millions of people around the world, they can still find it in other place.

3.) People travel to seek for work because they want to experience how to work from another place. We must admit that earning money is hard and some people decide to work abroad because they are looking for greener pasture. Other place pays bigger rates than their own place. We may also say that their expertise is not favorable in their own place. Unfortunately, they have to leave their families for awhile for a job opportunities abroad.

4.) People travel because they want to learn others cultures. They want to see the difference between their culture and other cultures. They want to learn others culture because for them traveling is fun while learning. One particular thing about the culture is the food.

They want to know how food is prepared and how it is done. Obviously, we all love to eat.

5.) People travel because they are writers. They want to give the readers relevant article to their readers especially when they are making story in that particular place

6.) People travel because they want to see all beautiful scenery of different countries. Others would want to take pictures because it serves as souvenirs.

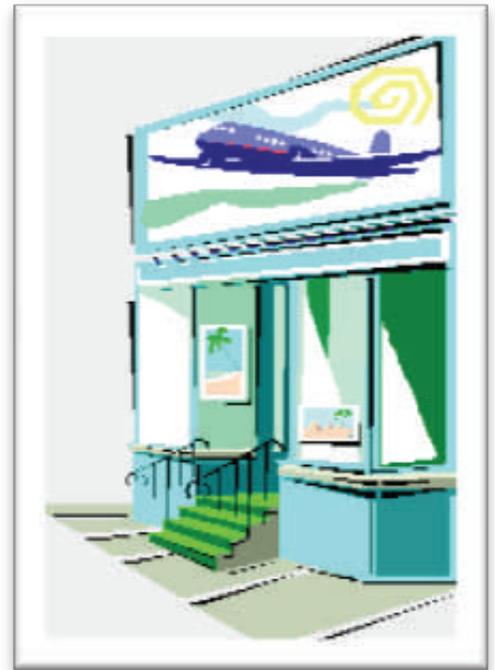

7.) When opportunity arise, it is hard to decide whether to leave your family and open a business far away your place. Some businessmen would rather put up business in other place because they want gain and it is more profitable than staying in their place. Business is nothing without profit.

Traveling is not only for rich people. Whether you are poor or in the middle class, you can travel as long as it fits your budget. Some travel for their goals, some travel for fun and relaxation and some travel for experience.
